

**Recommendation letter for Martin Hlavacka**

29/08/2019

I've had the pleasure of working with Martin Hlavacka for the past 6 months. Martin joined Colourbox as Frontend Developer. He's very ambitious and hard-working, and he quickly became an important member of our team. He takes ownership and responsibility for the tasks he is given.

In the frontend stack, Martin worked with technologies such as React and Angular. Besides working in the frontend, Martin was also responsible for creating a new internal CRM-system for us. He built a working system very fast, showing that he's also a very skilled Fullstack developer. The system was built using the PHP Framework Laravel.

Martin is leaving us to focus on his education (Master in Web Communication Design). While we're sad to see that Martin is leaving us, we fully support his decision.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jan Christensen". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
